

⚡ LIGHTNING NETWORK ⚡

⚡ WALLETS ⚡

CUSTODIAL WALLETS

EASY

THIRD PARTY KEYS

Custodial Lightning Network wallets are hosted by the respective wallet providing companies. All you have to memorize, is the email and password of your wallet. Commonly, those can be reset quite easily. Custodial wallets have simple user experiences. The private keys of your Bitcoin, are secured by your wallet of choice.

NON CUSTODIAL WALLETS

PRO

YOUR KEYS

Non-custodial Lightning Network wallets are secured by you. The seed phrase of your wallet must be safely stored, and never lost. If you happen to lose the seed phrase, then you will lose access to your Bitcoin. The increase in security usually means a decrease in usability.
